# Amjad Mohammed
## <Software & Web Developer />

In some jobs, 10 minutes can feel like an hour. With coding, an hour can feel like 10 minutes; that's how I realized where my passion lies. I love designing and building user-focused interfaces and applications.

## Relevant Experience

### Full-Stack Developer
### Bimm Digital Agency - Audi Program
2022 - Present (Toronto, Canada // Working remotely from Calgary)

- Spearheaded the development of user interfaces and micro frontend applications using React and TypeScript, ensuring optimal user experience and performance.
- Implemented AWS Lambdas in a Backend for Frontend pattern to streamline data retrieval and manipulation processes via GraphQL, enhancing system efficiency and scalability.
- Played a key role in debugging technical issues, employing a systematic approach to identify root causes and implement effective solutions, minimizing system downtime and enhancing user satisfaction.
- Collaborated closely with cross-functional teams in an Agile environment, actively participating in sprint planning sessions, stand-ups, and retrospectives to prioritize tasks and ensure timely project delivery.

### Freelance Web-Developer
2020 - Present (Calgary, Canada)

- Offering consultancy and website design and creation to local businesses and companies. Building static websites and single-page applications (SPA), as well as utilizing SEO practices to help companies grow their business.

### Jr. Software & System Engineer
### General Dynamics Mission Systems
2016 - 2018 (Calgary, Canada)

- Worked on developing a message delivery service in a large-scale tactical communication and information system for the British Ministry of Defense.
- Responsibilities included developing software capabilities for an embedded system using C++, developing a RESTful API interface leveraged by other services within the system, debugging code, developing unit tests and conducting code reviews for quality assurance.
- Continuously maintained software documents of design features and architecture.

## Education

2016 Graduate
**Bachelor of Engineering in Telecommunications**
Carleton University, Ottawa, Canada

## Skills

- React
- TypeScript
- JavaScript
- Redux
- HTML 5 & CSS 3
- NodeJS
- AWS Lambda
- SQL
- GraphQL
- REST API
- Jest
- C++
- Git

## Projects

- **Chorify.ca** - React SPA that incentivizes kids to do chores.
- **Amjad.ca** - my personal portfolio website.
